Field Service Maintenance Plans (FSM) - Provide a limited number of service items at the vehicles home. This service includes; inspecting and regulating the battery water levels, inspecting the tires and regulating the tire pressures, inspecting safety items for proper function, visual inspection of the vehicle for defects or damages that might impair use, test driving to confirm proper operations of steering, braking, performance and handling.

Personal Use Maintenance Plan - Provides a more complete service package that includes 11 monthly *FSM's* and one in-shop annual service. **The in-shop service includes;** Battery draw down test, physical inspection and adjustments of brakes, front end components and alignment, suspension components, safety components, tire condition and wear, servicing and lubricating serviceable items.

Rental Use Maintenance Plan - Provides an extensive service package that is designed around the demands and rigorous use when in a rental program. This includes 10 *FSM's* and two in-shop annual services. In-shop services are typically performed prior to and after the rental season. **The in-shop service includes;** Battery draw down test, physical inspection and adjustments of brakes, front end components and alignment, suspension components, safety components, tire condition and wear, servicing and lubricating

Rental Inspection Plans - Provides for vehicle inspections between rental usages. The purpose of these inspections is to inform the owner of the condition of the vehicle prior to and after the vehicle was used by rental guest. This is not a repair or maintenance program. It's sole purpose is to inform the owner of the vehicles condition so if damages have occurred, the owner can elect to collect for those damages and pin point the responsible party. Pictures and notes are provided with each inspection.

Rental Vehicle Maintenance & Inspection Plan - Provides the best overall protection to maximize the most use from the rental vehicle. This plan combines the *Rental Use Maintenance Plan and the Rental Inspection Plans*. Both serve different needs and by wrapping one around the other, the vehicle is properly serviced and the owner is informed of damages or problems prior to having to refund for an unexpected out-of-service surprise.
